

Generative AI with Python

“AI won’t replace you someone using AI will”

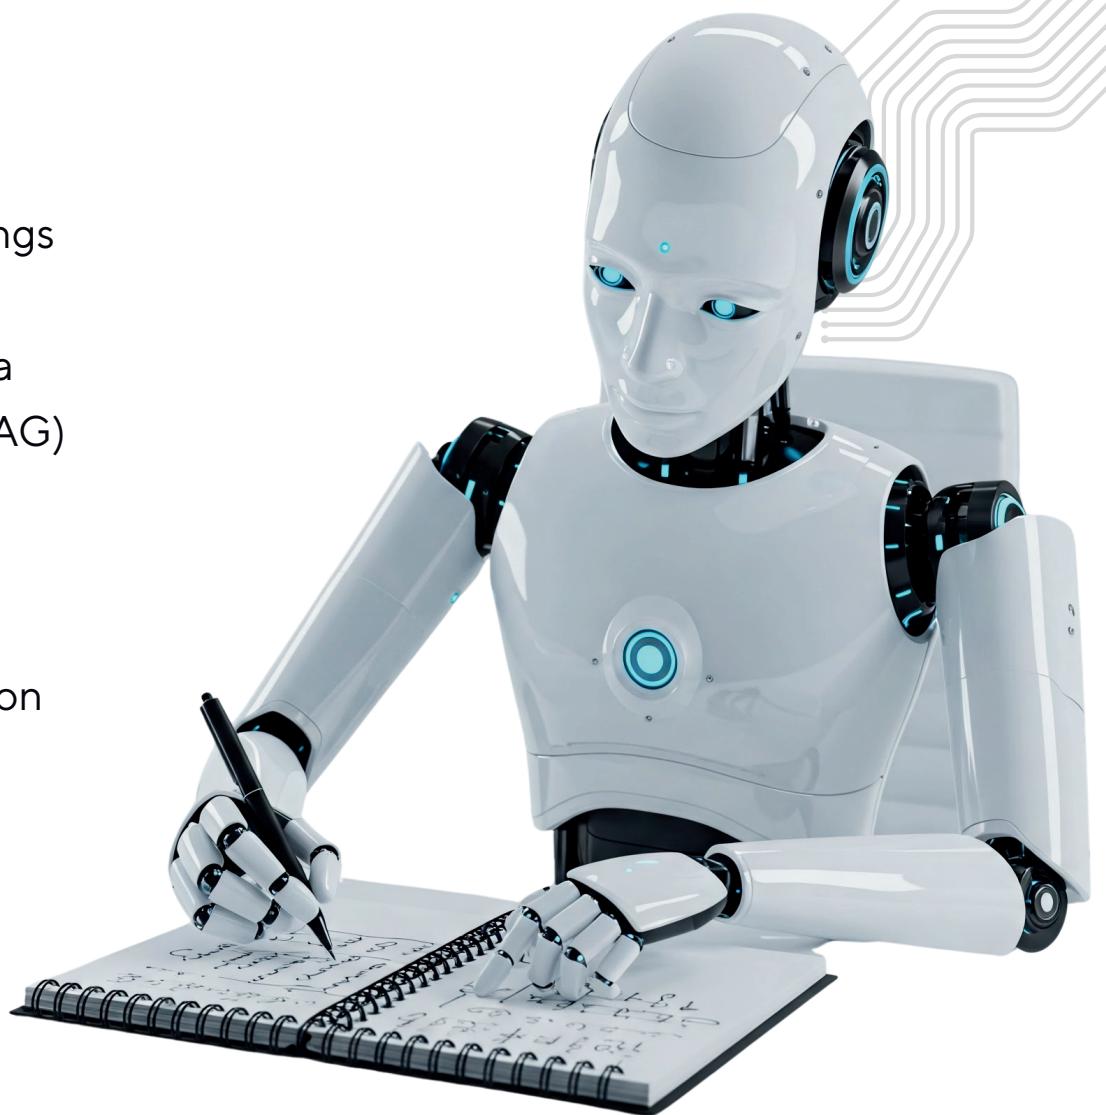

6-Month Mastery Program by Csight Innovations 40% OFF Now |
First Batch Starts Sept 1, 2025
From Zero to GenAI Pro – Start Building with AI!

Why Generative AI? Why Now?

Generative AI is transforming how we write, build, design, and communicate. With tools like ChatGPT, Gemini, Stable Diffusion, LangChain, and LangGraph, you can now develop intelligent, interactive, and creative applications – with just Python.

Core Topics Covered

- Python, Django & API Development
- NLP Basics, Tokenization & Embeddings
- OpenAI, Gemini, Claude APIs
- Vector DBs: Pinecone, FAISS, Chroma
- Retrieval-Augmented Generation (RAG)
- LangChain & LangGraph
- AI Agents & Agentic AI
- Model Context Protocol (MCP)
- Image Generation with Stable Diffusion
- Video Generation (Sora-like tools)

Generative AI with Python

6-Month Mastery Program by Csight Innovations 40% OFF Now |
First Batch Starts Sept 1, 2025
From Zero to GenAI Pro – Start Building with AI!

You'll Build These Projects

- AI-Powered Knowledge Q&A System using RAG
- Custom Chatbot App for Businesses
- Image Generator from Text Prompts
- Multi-Agent Assistant using LangGraph + MCP
- All projects are deployment-ready, perfect for job demos and startup MVPs!

Who Should Join

- Python Developers & Backend Engineers
- Freshers & Career Switchers
- Founders, Freelancers & Product Enthusiasts
- Curious Learners – No tech background required!
- Everything is taught from scratch with step-by-step guidance.

Pricing & Offer
